

Please Help Us

We are part of an eco-rally, driving from the UK to Greece, and we are using cars that are powered by vegetable oil.

We are collecting oil along the route by asking restaurants like yours for their waste oil.

Do you have any waste vegetable oil we can have? We can filter it and use it to run our cars.

You can find out more about the rally at [www.fatfinding.com](http://www.fatfinding.com) and if you like, we can put a link and photos on the website showing that you have helped us.

If you can't help us, can you suggest somewhere else we could ask for waste oil?

Thanks
